**Attachments:** WHO Health Assembly Healht Environment and Climate Change 2019.pdf

As a follow up, attached is the report to the WHA on Health, Environment and climate change- it looks like it was already circulated for the Board Meeting in January and there were “further consultations by member states in March 2019” – I haven’t seen it before but a very brief skim it seems to be a draft strategy to respond to environmental health risks.

Hi Marianne and Hodayah,

I managed to catch a little bit of an HHS interagency call this morning on prep for the world health assembly that will take place May 20<sup>th</sup>-28<sup>th</sup>. There was an executive board decision in January that addressed NCDs so it sounds like it won’t be a bit topic for the WHA. They will be sending out position papers and draft reports etc over the next few weeks, I’m on Maya’s distribution so should be copied to the extend we have bandwidth to engage.

## Ex. 5 Deliberative Process (DP)
